# Neuro-Psychiatry

## PCD Pharmaceutical Sector

The neuro pharmaceutical sector in India has been on a growth path in the recent past. With increased awareness regarding mental health and a surge in the demand for neurological treatments, the scope for Neuro Psychiatric Pharma Companies has opened new avenues of lucrative business.

### **1. Increased awareness of mental health**

In the last decade, mental health in India has received much attention, given the rapid rise in awareness about depression, anxiety, bipolar disorders, and other psychiatric disorders. Part of this shift in outlook has been made possible by the fact that the ever-growing recognition about mental health importance is just on par with physical health. As such stigma surrounding mental health fades, more people seek help, thus driving the demand for neuropsychiatry companies.

### **2. Increasing Neurological Disorders Cases in India**

India, as a large country, witnesses a growing rate of neurological disorders such as Alzheimer's, Parkinson's disease, stroke, and epilepsy. Increasingly, more people across ages are facing neurological disorders. The requirement for Neuropsychiatry Pharma Companies dealing in specialty products and treatments has gained exponential growth.

### **3. Neuro Medicine Innovations**

Advancement in medical technology have helped in forming new neuropsychiatric product range franchise companies offering a wide category of treatments for various neurological and psychiatric conditions.
